RE: Amendment of License No. SNM-247 for Additional Source Material

Dear Bill:

The purpose of this letter is to request an amendment for the following source material: thorium, any chemical/physical form, 250 kg. The material will be used for laboratory research, student instruction, and instrument calibration as described by the renewal application dated January 18, 1989 that is referenced in Condition 16. A. of Amendment No. 10 (page 3), issued March 22, 1989.

Through your discussions with Thomas Young of this office, I understand that all isotopes of thorium are included in the definition of source material so that it is not necessary to list individual isotopes e.g. Th-230, Th-228.

Similarly, isotopes of uranium that are not defined as special nuclear material are considered to be source material so that it is not necessary to list individual isotopes e.g. U-234, depleted uranium. All isotopes of uranium are considered to be included in Item B of License No. SNM-247, except for the special nuclear material i.e. U-233 (Item C) and U-235 (Item D). Use of depleted uranium for the TRUMP/S project was specifically described earlier, February 21, 1990, and is referenced as Item H.

Please contact me if additional clarification is needed. Thank you for your attention to this request.

Sincerely,

T. Lew Pitchford

T. Lew Pitchford,
Radiation Safety Officer
