Gentlemen:

**SUBJECT:** Completion of Procedure to Direct Operability and Reportability Determinations

In Reference 3 the Omaha Public Power District (OPPD) described various actions planned or taken relative to comments or concerns in the most recent SALP report for the Fort Calhoun Station. Among actions planned was creation of a corporate level procedure to direct operability and reportability determinations.

As noted in the response to the SALP report, OPPD anticipated completion of this procedure by the end of 1990. Due to recent operational considerations at the station, final management review of this procedure has progressed slower than anticipated. To allow proper review and consideration of any applicable comments, OPPD is deferring issuance of this procedure until February 1, 1991.

If you should have any questions concerning this matter, please contact me.

Sincerely,

*W. G. Gates*
