Washington, DC 20555

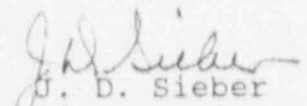

Reference: Beaver Valley Power Station, Unit No. 1
Docket No. 50-334, License No. DPR-66
R.G. 1.97 Resolution Schedule

Gentlemen:

The purpose of this letter is to confirm the rescheduling of the resolution of the Steam Generator Wide Range Level Instrumentation deviation to R.G. 1.97 to prior to the Ninth Refueling Outage instead of the Eighth Refueling Outage. The rescheduling was determined acceptable by telecon on November 28, 1990 between the NRC and Duquesne Light Company because of the status of the NRC review and the planning and scheduling window for the Eighth Refueling Outage.

Please contact my office if there are any questions regarding this submittal.

Sincerely,

J. D. Sieber
Vice President
Nuclear Group
