

UNITED STATES NUCLEAR REGULATORY COMMISSIONDOCKET NO. 50-302FLORIDA POWER CORPORATION, ET ALNOTICE OF ISSUANCE OF AMENDMENT TO FACILITY
OPERATING LICENSE

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 58 to Facility Operating License No. DPR-72, issued to the Florida Power Corporation, City of Alachua, City of Bushnell, City of Gainesville, City of Kissimmee, City of Leesburg, City of New Smyrna Beach and Utilities Commission, City of New Smyrna Beach, City of Ocala, Orlando Utilities Commission and City of Orlando, Sebring Utilities Commission, Seminole Electric Cooperative, Inc., and the City of Tallahassee (the licensees) which revised the Technical Specifications for operation of the Crystal River Unit No. 3 Nuclear Generating Plant (the facility) located in Citrus County, Florida. The amendment is effective as of the date of issuance.

The amendment pertains to the Environmental Technical Specifications (Appendix B to the Facility Operating License). The amendment (1) deletes all water quality requirements, (2) upgrades and changes the section on Administrative controls, and (3) divides the Appendix B Technical Specifications into two parts: Part I- Radiological Environmental Technical Specifications, and Part II- Environmental Protection Plan (Non-radiological) Technical Specifications.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act),

-2-

and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that dividing the Appendix B Technical Specifications into two parts and the changes to administrative controls will not result in any significant environmental impact and pursuant to 10 CFR §51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the changes. The Commission has also determined that the deletion of water quality requirements is a ministerial action required as a matter of law and that therefore no environmental impact statement or environmental impact appraisal and negative declaration need be prepared in connection with this action.

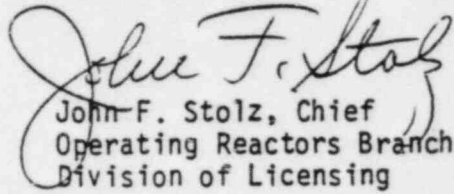

For further details with respect to this action, see (1) the application for amendment dated February 19, 1982, (2) Amendment No. 58 to License No. DPR-72, and (3) the Commission's letter to Florida Power Corporation dated October 12, 1982. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, D.C., and at the Crystal River Public Library, 668 N.W. First Avenue, Crystal River, Florida. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear
