Docket Nos. 50-313 and 50-368
License Nos. DPR-51 and NPF-6
Generic Letter #82-12
Nuclear Power Plant Staff Working Hours

## Gentlemen:

Per a verbal request from Guy Vissing and Jan Stevens of your staff, the purpose of this letter is to confirm the implementation of the overtime guidelines in Generic Letter #82-12. Generic letter #82-12 requires administrative procedures to implement the current NRC working hour guidelines. Specifically, the letter states: "The controls shall apply to the plant staff who perform safety-related functions (e.g., senior reactor operators, reactor operators, auxiliary operators, health physicists and key maintenance personnel)."

In accordance with this requirement AP&L has written or revised the following procedures.

 Procedure 1015.01, Revision 8, "Conduct of Operations," Approved September 2, 1982

This procedure incorporates the overtime guidelines for shift operating personnel (e.g., senior reactor operator, reactor operators, waste control operators, auxiliary operators and shift administrative assistants).

 Procedure 1025.03, Revision 2, "Conduct of Maintenance," Approved October 14, 1982

and written documentation as to the cause.

This procedure incorporates the overtime guidelines for key shift maintenance personnel. Revision 0 to this procedure was approved on September 28, 1982, and contained the NRC overtime guidelines. Subsequent review of the procedure revealed that requirement to document any authorized deviation to the established guidelines was not included. Revision 2 to the procedure incorporated the documentation requirement.

individual is not to serve two consecutive duty days nor more than two duty days in a seven-day period without approval of the General Manager

Very truly yours,

John R. Marshall Manager, Licensing
