Attn: Document Control Desk

Subject: Zion Station Units 1 and 2
 Inservice Testing Program
 Request for Additional Information
NRC Docket Nos. 50-295 and 50-304

- Reference: a) December 5, 1990 letter from R.M. Pulsifer to T.J. Kovach
- b) November 21, 1990 teleconference between S. Stimac and R. Wulf (CECo) and C. Patel (NRC)
- c) November 29, 1990 letter from D.L. Taylor to U.S. NRC

Gentlemen:

Reference (a) transmitted an NRC Request for Additional Information (RAI) regarding the scope of the ASME Section XI testing program for Zion Station. Reference (a) also requested that Commonwealth Edison respond to the RAI within 45 days.

During the reference (b) teleconference, the expected content of the RAI and our schedule for responding to the RAI were discussed. At this time, it was agreed that our response would be forwarded to NRC no later than March 31, 1991. The compelling reason for choosing this date is the need to coordinate this effort with our ongoing efforts to revise the Zion inservice testing program pursuant to Generic Letter 89-04, as discussed in reference (c). Therefore, unless otherwise notified by your office, we will submit our response to the subject RAI no later than March 31, 1991.

If there are any questions or comments regarding this matter, please direct them to this office.

Very truly yours,

S.F. Stimac
 Nuclear Licensing Administrator
