SALEM GENERATING STATION SECURITY PLAN

REVISION 7

PURPOSE OF CHANGE: Revision 7 is submitted to reflect recent changes to the security organization. These changes are the result of the establishment of the Nuclear Department and its relocation to Artificial Island, the site of Salem Generating Station. The changes involve the reorganization and augmentation of the PSE&G and security contractor management organizations.

EVALUATION: The new organization will strengthen the security program and provide increased management oversight and effectiveness. Therefore, it has been determined that this change does not represent a degradation of the Security Plan provisions.
