SUMMARY

Scope:

This routine, unannounced inspection was conducted in the area of Physical Security Program for Power Reactors, specifically management support; security program plans; audits; protected and vital area barriers; detection aids; assessment aids; protected and vital area access control of packages, personnel and vehicles; alarm stations and communications; power supply; testing, maintenance and compensatory measures; and security training and qualification.

Results:

In the areas inspected, violations or deviations were not identified.

Inspection findings confirmed continued improvement in the effectiveness of the security program. Security personnel appeared to be motivated and professional in their approach to duty performance. Corporate and site management appear to provide the appropriate amount of guidance and support to the security program at the Surry Nuclear Station.
