U.S. Nuclear Regulatory Commission Attn: Document Control Desk Washington, DC 20555

SUBJECT: Peach Bottom Atomic Power Station, Units 2 and 3 Limerick Generating Station, Units 1 and 2 Supplemental Response to Generic Letter 89-10, "Safety-Related Motor-Operated Valve Testing and Surveillance," dated June 28, 1989

REFERENCE: Letter dated December 28, 1989 from D. R. Helwig (PECo) to NRC

Dear Sir:

The referenced letter provided Philadelphia Electric Company's (PECo's) response to Generic Letter (GL) 89-10 for Peach Bottom Atomic Power Station (PBAPS), Units 2 and 3, and Limerick Generating Station (LGS), Units 1 and 2. In the response we committed to providing an implementation schedule for certain motor-operated valve (MOV) preventive/predictive maintenance program upgrades by November 30, 1990. These program upgrades were described in our responses to CL 89-10 Items d, h and j. The NRC documented its review of our response by letters to PECo dated July 5 and July 10, 1990 for FBAPS Units 2 and 3 and LGS Units 1 and 2, respectively.

Supplement 2 to GL 89-10 (dated August 3, 1990) stated that licensees may defer completion of their GL 89-10 program description until January 1, 1991. Because we planned to include the schedule for the subject program upgrades in the GL 89-10 program description, on December 5, 1990 we proposed to the NRC Technical Contact for GL 89-10 that we be permitted to submit this schedule after January 1, 1991. The NRC Technical Contact indicated that submittal in the first week of January 1991 was acceptable to him. This was also discussed with the PBAPS and LGS NRC Project Managers,

U:S. Nuclear Regulatory Commission Response to GL 89-10 December 31, 1990 Page 2

and was found acceptable to them. Accordingly, this letter provides the schedule information.

The MOV preventive/predictive maintenance program upgrades are now implemented at PBAPS Units 2 and 3. The schedule for implementing the MOV preventive/predictive maintenance program upgrades at LGS Units 1 and 2 is attached.

If you have any questions or require additional information, please contact us.

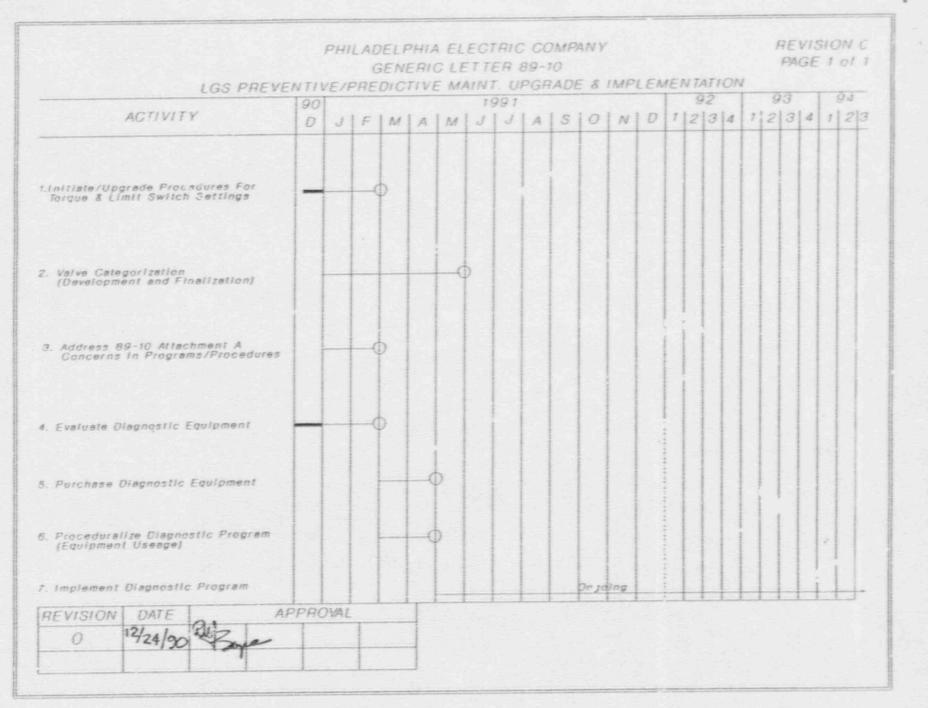

Very truly yours,

PM Kut for

G. J. Reck, Manager Licensing Section Nuclear Engineering and Services
