Re: License No. 37-00276-25

Dear Mr. Miller:

In response to your letter dated October 13, 1982, regarding the special safety inspection conducted by Ms. E. Matson of your office, we offer the following reply to Appendix A referring to the items of noncompliance discovered.

1. License Condition 10: Violation is admitted. We offer no excuse other than we just failed to request the address change. However, this item has been corrected. Attached you will find a copy of Amendment No. 39 authorizing our new address as the proper location.

2. License Condition 20: Violation is admitted. This item has also been corrected. Survey meter #4310 was shipped to Cleveland on September 13, 1982. We will continue to supply them with radiation survey meters to fulfill this condition.

Regarding the radiography operations, we are in the process of commencing with radiography in the near future. We have trained two (2) of their experienced radiographers here in Pittsburgh and Mr. Andresky has planned in the near future to go to Cleveland, train Mr. Biasella and establish a radiographic records file system.

The above should resolve the items mentioned in your letter, however, should you have any questions, please feel free to contact me.

Very truly yours,

PITTSBURGH TESTING LABORATORY
