

James E. Cross Vice President, Nuclear

December 28, 1990

Trojan Nuclear Plant Docket 50-344 License NPF-1

U.S. Nuclear Regulatory Commission Attn: Document Control Desk Washington DC 20555

Dear Mr. Martin::

## Violation of National Pollutant Discharge Elimination System (NPDES) Permit

Pursuant to Section 3.2 of Appendix B to Facility Operating License No. NPF-1 for the Trojan Nuclear Plant, the attached report is forwarded describing violations of the NPDES Permit during September 1990. The violations involved exceeding the limit for Flant offluent suspended solids and biological oxygen demand.

The attached report is a revision to the report originally sent to the Oregon Department of Environmental Quality. The revision corrected errors that were identified in preparing this letter.

Sincerely,

mod

T. D. Walt for J. E. Cross

George Yun Oregon Dept Environmental Quality Executive Building 811 SW Sixth Ave Portland OR 97204

Dear Mr. Yun:

1

Attached are two revised copies of the September 1990 NPDES report for the Trojan Nuclear Plant. These should replace the copies proviously submitted (letter from R. J. Hess dated October 10, 1990).

The revisions are as follows:

- Cover letter Page 2. The first sentence of the next to last paragraph begins, "The main plant outfall pH monitor was out-of-service from 1703 hours on September 10 to 1705 hours on September 14...".
- Discharge Monitoring Report (DMR) forms. Numbering was completed in the lower right hand corner of each page (i.e. 1 of 1, 1 of 2 etc).
- DMR 002A Reference was made in the comment and explanation section to refer to the cover letter for an explanation regarding the violations of permit limitations.

If you have questions, please contact Stan Katkansky at 464-8524.

Sincerely,

TP & Heri

R. J. Hess, Manager Environmental Sciences
