

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

WESTINGHOUSE ELECTRIC CORPORATION

DOCKET NO. 50-87

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 7
License No. R-119

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The facility will operate in conformity with the provisions of the Atomic Energy Act of 1954, as amended, and the rules and regulations of the Commission;
 - B. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - C. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public;
 - D. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied; and
 - E. Publication of notice of this amendment is not required since it does not involve a significant hazards consideration nor an amendment of a license of the type described in 10 CFR Section 2.106(a)(2).
2. Accordingly, Facility Operating License No. R-119 is hereby amended by changing paragraph 2.C.(3) to read as follows:
 - (3) Physical Security Plan
 - a. The licensee shall maintain and fully implement all provisions of the Commission's approved physical security plan for the protection of special nuclear material of moderate strategic significance, including amendments and changes made pursuant to the authority of 10 CFR 50.54(p). The approved security plan consists of a document withheld from public disclosure pursuant to 10 CFR 73.21 entitled "Westinghouse Nuclear Training Center, Nuclear Training Reactor Security Plan," dated November 24, 1981, submitted by letter dated November 23, 1981.

- b. In the event of any conflict between these conditions and the provisions of the licensee's security plan, the requirements of the conditions shall prevail.
 - c. The total quantity of unirradiated special nuclear material located within the Westinghouse Nuclear Training Reactor facility, as authorized under License No. R-119, shall not exceed the quantity specified for "Special Nuclear Material of Moderate Strategic Significance," as defined in 10 CFR 73.2(x).
 - d. All packages leaving the Controlled Access Area (CAA) which are larger than a fuel element shall be searched on a random basis.
 - e. The visitor-to-escort ratio within the CAA shall not exceed 20 to 1.
 - f. The licensee shall establish procedures so that whenever the site is occupied an individual is present who has been assigned responsibility for assuring that the Zion Police Administration is contacted in case of a Safeguard Contingency.
 - g. Intrusion alarm systems for the CAA shall be provided with a tamper-indicating capability.
 - h. Visitors shall be issued and shall display a distinctive badge indicating that an escort is required whenever they are within the CAA.
 - i. The licensee shall institute and follow procedures which assure that the key to the CAA is returned to its storage location except when in use as part of the interlock system for reactor operation.
 - j. The senior Authorized Individual at the Training Center shall be responsible for notifying the local law enforcement agency in the event of an unauthorized penetration or activity.
3. The license amendment is effective as of the date of issuance.

FOR THE NUCLEAR REGULATORY COMMISSION
