NRR INPUT TO SALP EVALUATION FOR MARBLE HILL 1/2
(CONSTRUCTION PHASE) COVERING THE PERIOD FROM
OCTOBER 1, 1981 TO SEPTEMBER 30, 1982

FUNCTIONAL AREA 8 - LICENSING ACTIVITIES

ANALYSIS

Management Involvement in Assuring Quality/Responsiveness to
NRC Initiatives

Evidence of prior planning and assignment of priorities has been consistently demonstrated by the applicant in the preparation of the FSAR and ER for the OL application. The applicant plans to submit the Marble Hill OL application on December 1, 1982 as scheduled.

PSI management promptly responded to a new rule, 10 CFR 50.34(g), published on March 18, 1982, which required the applicant to include additional information in the FSAR submittal. The applicant met with NRR and subsequently initiated a program to supply this information for the FSAR on a schedule commensurate with the NRR license review schedule. Additionally, following NRR request, the applicant met with the staff to discuss this program. The program appeared to be both technically sound and thorough.

The applicant also initiated early discussions with the staff regarding its Pre-operational Environmental Radiological Monitoring Program and its emergency planning submittal.

PSI has shown strict adherence to its procedures and policies regarding replication of Byron. Its policy concerning the format and content of the FSAR has been well stated and is understandable. During meetings with NRR, PSI reaffirmed its intent to hold Marble Hill design changes to a minimum as directed in a letter to Dr. James Coughlin of PSI from Ben C. Rusche, Director, NRR, dated November 3, 1975. The applicant makes frequent efforts to review and discuss its policy of replication of Byron with members of the staff involved with Marble Hill.

Approach to Resolution of Technical Issues from a Safety Standpoint

There was no basis for evaluation of the applicant's performance during this SALP period.

Enforcement History

This item not applicable to licensing activities in NRR during construction phase.

Reporting and Analysis of Reportable Events

This item not applicable to licensing activities in NRR during construction phase.

Staffing (Including Management)

PSI staffing is ample as indicated by its ability to meet the scheduled date for submittal of the OL application. Positions and authority are well defined.

Training and Qualification Effectiveness

This item not applicable to licensing activities in NRR during construction phase.

CONCLUSION

PSI is rated in Category I for Licensing Activities.
