U.S. Nuclear Regulatory Commission Attn: Document Control Desk Washington, DC 20555

Subject: Limerick Generating Station, Units 1 and 2

Peach Bottom Atomic Power Station, Units 2 and 3 Installation of Emergency Notification System and Health Physics Network Capabilities at the Proposed

Combined Emergency Operations Facility

Gentlemen:

This letter is being submitted to request that the Nuclear Regulatory Commission (NRC) make the appropriate arrangements to have the dedicated Emergency Notification System (ENS) and Health Physics Network (HPN) system installed at the proposed combined Emergency Operations Facility (EOF) for Limerick Generating Station (LGS) and Peach Bottom Atomic Power Station (PBAPS), which is to be located in Coatesville, Pennsylvania.

By letter dated March 29, 1990, the NRC approved Philadelphia Electric Company's (PECo's) request to construct a new combined EOF for LGS and PBAPS adjacent to our existing Coatesville Service Filding facility. The proposed Coatesville EOF is currently under design and is scheduled for completion by November, 1991. We

A045

9101140068 910108 PDR ADOCK 05000277 F PDR understand that adequate lead time is necessary to ensure that ENS and HPN capabilities will be available upon completion of our new EOF facility. Therefore, we would appreciate the NRC's assistance regarding the installation of these dedicated systems in order to support our construction schedule.

If you have any questions, or require additional information, please do not hesitate to contact us.

Sincerely yours,

G. J. Beck Manager
