U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Reference: General Licensed detectors
Licenses involved 20-18358-02 and Tx 6-1186

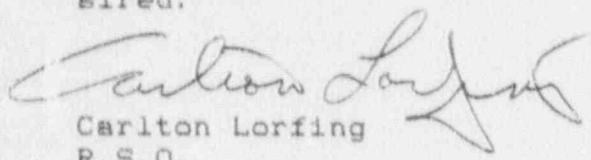

On November 12, 1990, Tremetrics Inc. acquired the assets of Waters Chronography Division. Records, which Waters has provided to Tremetrics, indicate that shipments were made into states under your jurisdiction. Waters General License 20-18358-02 was the basis for these shipments. Effective as of 11/20/90, Tremetrics has transferred control of this GENERALLY LICENSLED MATERIAL to the TEXAS license 6-1186 which expires as of 04/31/91. The detectors involved were manufactured for Waters under an OEM agreement and are covered under the Agreement States listing TX642D103B.

Under the terms of the Texas license, shipments made to AGREEMENT STATES are transmitted to that particular state. The attached listing (covering the 5 regions of the NRC) contain those shipments which are now shown to be under Agreement States Jurisdiction. Please make necessary changes as relate to your jurisdiction.

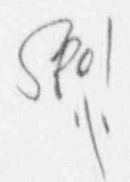

The listing column labeled "AUTHOR" is the authority which Tremetrics is in the process of notifying of this General License change. The column marked "WATERS" is the regional authority which Waters indicates was notified of the original shipment. Changes which do not involve jurisdictional changes are being handled under separate letter.

In addition, all customers which are involved in this transfer have been notified regarding this change in General Licensee.

Please contact my office if additional information is desired.
