Docket 50-293

Withdrawal of Proposed Change to MCPR Technical Specifications

Boston Edison Company (BECO) proposed changes to Appendix A of Operating License DPR-35 by letter dated November 8, 1990. The proposed changes upgraded the Safety Limit Minimum Critical Power Ratio (MCPR) and revised the Operating Limit MCPR so as to extend the use of Pilgrim's spectral shift fuel use strategy during Cycle 8.

The November 8, 1990 request also stated that its proposed MCPR changes would not be needed if our August 21, 1990 proposed change concerning cycle-specific fuel parameters was approved by the NRC first. On January 2, 1991, the NRC approved our August 21, 1990 request via Amendment No. 133 to DPR-35.

Therefore, BECO hereby withdraws our November 8, 1990 proposed change.

  
G. W. Davis
