SUBJECT: Limerick Generating Station, Units 1 and 2
Peach Bottom Atomic Power Station, Units 2 and 3
Generic Letter 88-14, "Instrument Air Supply
System Problems Affecting Safety-Related Equipment"
Clarification of Final Report Submittal Date

Dear Sir:

In a letter dated February 13, 1989, Philadelphia Electric Company (PECO) responded to Generic Letter 88-14, "Instrument Air Supply System Problems Affecting Safety-Related Equipment." This response identified several actions to be completed and stated that "a summary report will be submitted by 60 days following restart from the next refueling outage of Peach Bottom Atomic Power Station, Unit 3..." The Nuclear Regulatory Commission (NRC) response dated May 23, 1990 stated that a summary report on all actions taken at Peach Bottom and Limerick will be submitted in the summer of 1991.

It appears that the summer of 1991 date was based on the use of the PBAPS Unit 2 outage schedule. Based on the current PBAPS Unit 3 outage schedule, we anticipate that a final response will be submitted in early 1992. The current scheduled end date for the Unit 3 refueling outage is December 6, 1991. This date is a clarification of our commitment in the February 13, 1989 Generic Letter 88-14 response.

Very truly yours,

G. J. Beck
