Subject: Project No. 669 - Advanced Light Water Reactor Seismic Design
and Evaluation Program

- References:
- 1) Letter from E. E. Kintner to the Document Control Desk dated September 7, 1990, Attention: Thomas J. Kenyon
 - 2) Letter from John J. Taylor to the Document Control Desk dated September 6, 1990, Attention: Thomas J. Kenyon

Enclosed is a description of the seismic design and evaluation program for the Advanced Light Water Reactor. This description includes discussions on the seismic design basis and the use of probabilistic risk assessment.

The enclosed information is EPRI proprietary information subject to license restrictions. The basis on which this information should be withheld from public disclosure is set forth in the Application for Withholding Proprietary Information from Public Disclosure with supporting affidavit transmitted with the September 7, 1990 submittal (References 1 and 2).

Please call John D. Trotter at (415) 855-2786 if you have questions.

Sincerely,

W. R. Sugnet
Senior Program Manager
Advanced LWR Program
