

JAN 10 1991

Docket No. 50-382/90-25
License No. NPF-38

Entergy Operations, Inc.
ATTN: Ross P. Barkhurst, Vice President
Operations, Waterford
P.O. Box B
Killona, Louisiana 70066

Gentlemen:

This refers to the inspection conducted by Messrs. R. E. Baer and L. Wilborn of this office during the period December 3-7, 1990, of activities authorized by NRC Operating License NPF-38 for Waterford Steam Electric Station, Unit 3, and to the discussion of our findings with Mr. P. V. Prasankumar and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included selected portions of the radiological controls program. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified. Two open items identified for inspector followup are discussed in paragraph 5 in the enclosed report. These open items involve commitments from you to complete certain activities. If your understanding of these commitments is different than that discussed in paragraph 5, please let us know.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By

Samuel J. Collins, Director
Division of Reactor Projects
