

November 1, 1982

Honorable Richard T. Quinn
Village Hall
11004 Carpenter Street
Mokena, IL 60448

Dear Mayor Quinn:

SUBJECT: ISSUANCE OF NRC LICENSE TO: American Testing & Inspection
P.O. Box 878
Mokena, IL 60448
License No. 12-21101-01

This is to inform you that the subject organization has been issued a license by the Nuclear Regulatory Commission (NRC) for the possession and use of iridium-192 and cobalt-60 sealed sources as exposure devices for the conduct of industrial radiography. This notification is in accordance with NRC policy of informing public officials when organizations located in their jurisdiction are first licensed.

Included among the Nuclear Regulatory Commission's responsibilities are the regulation of the use of radioactive materials for industrial applications, medical diagnosis and treatment, applied research and development, academic research, and in consumer products. A license is intended to provide reasonable assurance that the public health and safety is adequately protected, by prescribing specific conditions and requirements for the use of authorized radioactive sources.

We will be periodically performing unannounced inspections of this facility to insure safe use of such licensed materials. Inspection reports are routinely made available to the public following proprietary review.

If you have any questions, please let me know.

Sincerely,

William B. Menczer
Regional State Liaison Officer
