Subject: Primary Containment Atmospheric Monitoring

Dear Sir:

In Reference (b), we provided you with our expected schedule with regard to installation of redundant containment atmospheric monitoring equipment. We also informed you that our schedule was dependent on the timely receipt of the new hydrogen/oxygen analyzers, as well as no unforeseen difficulties in the installation and preoperational testing of the new equipment.

At the present time, we are proceeding with the installation of the new hydrogen/oxygen analyzers. However, our proposed installation schedule has been set back by unexpected delays in performing analyses in support of the design, which subsequently affected the delivery of certain equipment. Our revised schedule calls for installation and preoperational testing of the equipment to be completed by the end of December 1982.

In the interim, we will continue to provide for primary containment atmospheric monitoring, as discussed in Reference (b). We will also inform you of any delays in meeting this schedule.

We trust that this information is acceptable; however, should you have any questions or desire additional information, please contact us.

Very truly yours,

VERMONT YANKEE NUCLEAR POWER CORPORATION
