Dear Bob:

Enclosed is the response to your request for the proposed schedule of NRC activities which will be conducted in an effort to identify and evaluate sources of operator stress associated with requalification examinations. The three primary activities will be: (1) site visits for the purpose of interviewing operators and licensee staff associated with the requalification process, (2) site visits to observe both NRC and licensee-administered examinations, and (3) a questionnaire which will be mailed to a large sample of licensed operators. Enclosure 1 contains a preliminary schedule for accomplishing the assessment.

The Human Factors Assessment Branch of the Division of Licensee Performance and Quality Evaluation will be coordinating and conducting the assessment activities. Should you have any questions concerning the specific activities or proposed schedule, please contact David Desaulniers (FTS 492-1043).

Sincerely,

Jack W. Roe, Director
 Division of Licensee Performance
 and Quality Evaluation
 Office of Nuclear Reactor Regulation
