Docket #030-07022  
License #29-13612-02

Dear Mr. Kinneman:

In compliance with condition 20 B., the following corrective actions have been taken in response to the quarterly independent radiation safety audit of October 24 and December 23, 1989.

#### Routine Operations

The record keeping error noted by Mr. Slobodien's audit had previously been identified during a corporate audit and had been documented.

#### Preventive Maintenance

All quarterly maintenance was completed by December 31, 1989.

#### Materials Concerns

This has been discussed and the possibility of a shield is being evaluated.

#### Unusual Film Badge Result

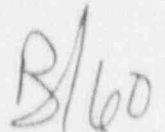

An investigation was conducted as soon as the film badge report was received. The individual was re-instructed on proper handling of personal dosimetry. This exposure was to the film badge and not to the individual.

Very truly yours,

John D. Schlecht  
Radiation Safety Officer
