Release

MAR 07 1990

Memorandum For: Thomas T. Martin, Deputy Regional Administrator

Thru: *JRW* Malcolm R. Knapp, Director  
*fer* Division of Radiation Safety and Safeguards

From: John R. White, Chief  
 Nuclear Materials Safety Section C

Subject: RTI, INCORPORATED (Reference Memo to Thomas Martin from John White, same subject, dated February 23, 1990)

On March 7, 1990, I called the telephone number Dr. Martin Welt had provided as a contact point, and left a message for a return call. Later I received a call from Andrew and Bruce Welt, Alpha-Omega Technology, Incorporated. We discussed Dr. Welt's request as documented in the referenced memorandum.

In that discussion, I informed them of the current license condition (License Condition Number 11.E) that prohibits Dr. Welt's involvement in RTI "as an officer, employee, or consultant...". I indicated that in order for Dr. Welt to become involved in such capacity, the license would have to be amended in accordance with an amendment request from either: (1) the licensee, filing under the requirements of 10 CFR 30.38; or (2) an individual, filing under the requirements of 10 CFR 2.206. I further indicated that upon receipt of such request, the NRC would evaluate the submittal to determine if sufficient basis and reason was provided to support the amendment.

Relative to this matter, Bruce and Andrew Welt requested that the NRC make the following determinations:

1. Since Andrew and Bruce Welt are not identified in any way as being prohibited from participation in activities relative to RTI, would the NRC have any objection to them becoming involved in the company in any capacity (including as an officer, employee, consultant, or member of the Board of Directors)? Does the restriction of License Condition 11.E affect them as well as their father? If there is an objection, what is the basis?

2. Since License Condition 11.E indicates that Dr. Martin Welt may not "perform any services for Radiation Technology, Incorporated, as an officer, employee, or consultant...", is the restriction interpreted to also exclude him from being appointed to the Board of Directors of the company? (Bruce and Andrew Welt contend that a member of the Board of Directors is not a officer, employee, or consultant of the corporation.)

If it is determined that a member of the Board of Directors is not an officer, employee or consultant of the company, would the NRC have any objections to Dr. Welt seeking appointment to the Board at the next annual shareholders meeting of the corporation (scheduled for May 1990)? If there is an objection, what is the basis?

Relative to these matters, Bruce and Andrew Welt request that the NRC make a timely determination and provide a written response so that action can be initiated in time for the annual shareholders meeting. To this end, they will prepare a written request to the NRC relative to these matters.

John R. White, Chief  
Nuclear Materials Safety  
Section C
