Stat Tech Specs*

DATE: 9/25/79

NAME OF OTHER PARTY AND HIS ORGANIZATION: J. Collins (NRC)

SUBJECT OF COMMUNICATION: Recovery Mode T.S. Surveillance Procedures

SUMMARY OF DISCUSSION:

In an informal discussion with J. Collins on 9/21/79, the following items were discussed.

1. Recovery Mode T.S. Surveillance Procedures reviewed and signed by the NRC, require that all subsequent changes (i.e.: PCRs & TCNs) to that procedure, be reviewed by the NRC.
2. Recovery Mode T.S. Surveillance Procedures which receive a "Receipt Acknowledged" response from the NRC DO NOT require an NRC review on subsequent changes (i.e.: PCRs & TCNs).

NOTE: It should be noted that it will be easy to determine which of the Recovery Mode T.S. Surveillance Procedures are of the "Receipt Acknowledged" variety; they will have a Not Applicable (NA) in the NRC signature block.

I will submit a change to put this information into APi001.
