

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

*File
TMI-2*

FEB 21 1980

Docket No. 50-320

MEMORANDUM FOR: Richard H. Vollmer, Director, TMI Support
FROM: Bruce A. Boger, TMI Support
THRU: John T. Collins, Deputy Director, NRC/TMI Technical Support Staff
SUBJECT: OPERATOR LICENSING EXAMS AT TMI-2

Attrition and transfer of licensed personnel have reduced the number of individuals qualified to stand watch on TMI-2. Therefore, in order to maintain the operating staff at the level necessary to meet Technical Specification requirements, additional personnel must be examined.

I plan to administer exams to one applicant for an initial Reactor Operator License and three to five applicants for upgrade Senior Reactor Operator Licenses during the week of March 17, 1980. As noted in the attached memo from P. F. Collins to H. R. Denton dated January 10, 1980, any licenses issued will be restricted to cold shutdown operations. Accordingly, the exam will stress those systems required for the shutdown and recovery of TMI-2.

A handwritten signature in black ink that reads "Bruce A. Boger".

Bruce A. Boger
TMI Support

Enclosure:
Memo to H. Denton,
