RE: SPENCER CHEMICAL COMPANY - LICENSE NO. SNM-154

In reply to the licensee's letter of November 20, 1962, requesting termination of the subject license, L&R informed the licensee by letter dated December 18, 1962, that surveys showing contamination levels of the facility should be sent to L&R at least fifteen days prior to vacating the facility. Has L&R received any such surveys, and if so, please send a copy to this office. If not, is there any information showing the current status of this license?
