Merriam, Kansas

Attention: Mr. H. A. Greenlee

Gentlemen:

The information contained in your letters dated January 29, and March 2, 1964, regarding the levels of uranium contamination remaining in your facility after completion of decontamination procedures, has been reviewed in connection with the activities performed under the license.

As a result of this review, we have concluded that due to the insignificance of the contamination which might be present in this particular instance, no hazard to health and safety is involved, and no license would be required for any persons possessing or occupying such facilities. Therefore, pursuant to your letter of November 20, 1962, license SM-154 is hereby terminated.

Sincerely yours,

Lyall Johnson
Acting Director
Division of Materials Licensing
