Solid Waste*

November 5, 1980

Daily Report
Office of State Programs

The State of Washington passed Initiative 383 on November 4, 1980 by approximately 75% of the votes cast. Initiative 383 would ban all radioactive waste, except medical waste, into the State of Washington after July 1, 1981, unless permitted by regional compacts. The Washington regulatory agency believes that the initiative will be challenged in the courts on constitutional grounds.
