Hi Wendy,

Thank you for accommodating NuScale's input at the meeting today. To ensure the transcript captures our input correctly – here is what we stated on the phone.

“NuScale does not manufacture the fuel for our Small Modular Reactors (SMR). Plant owners – our customers – typically manage contracting for fresh fuel and spent fuel handling. Potential NuScale customers in foreign nations have expressed interest in a U.S. fuel takeback option that involves reprocessing. Such an option is particularly attractive to those customers in smaller nations with an intention to have limited nuclear deployment, but are reluctant to move forward, because it is generally impractical or technically infeasible to develop a long-term national spent fuel disposition program for such limited deployment.”

Regards,

Derick Botha

Hi Derick,

Thank you for your interest in the meeting.

The NRC is not requesting written comments, since the meeting is being transcribed; however, you are welcome to submit comments by email as well and I will make them part of the public record.

Please let me know if you have any further questions.

Regards,
Wendy

Hi Wendy,

Please register NuScale's participation in NRC's "Status of Spent Fuel Reprocessing Rulemaking" meeting tomorrow (3/4). Gary Becker and I plan to call in and have some input we would like to provide. Beyond providing input over the phone tomorrow, is there another format that will be helpful for NRC? Maybe an email?

Regards,

Derick Botha
