Subject Radio Repeater Station

Location TMI

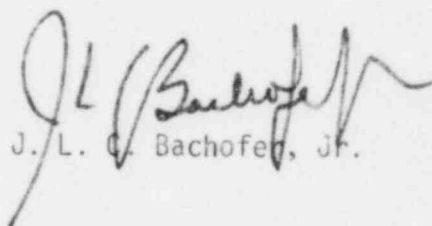

To Carl Plumley - NRC

Date January 8, 1980

This will confirm various telecons today involving ourselves and John Collins.

I have arranged with Mr. E. H. Elliehausen, Met Ed's Lebanon Division Manager to accomplish transfer of NRC's repeater station from the present trailer located adjacent to the TMI Observation Center to the Observation Center itself. Mr. Elliehausen understands the necessity to complete this before 1/31/80. I have repeated to Mr. Elliehausen my suggestion to you that a functional test be accomplished to confirm satisfactory operation prior to permanent attachment of the antenna in its new location.

Mr. Neil F. Light will be contacting you directly to make specific arrangements.

J. L. C. Bachofer, Jr.
