

APPENDIX A

NOTICE OF VIOLATION

Plastimo, USA, Incorporated
Baltimore, Maryland 22127

Docket No. 99990001

As a result of the inspection conducted on December 13, 1990, and in accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (Enforcement Policy) (1990), the following violation was identified:

10 CFR 30.15(b) requires that any person who desires to apply byproduct material to, or to incorporate byproduct material into, the products exempted in paragraph (a) of that section, or who desires to initially transfer for sale or distribution such products containing byproduct material must apply for a specific license pursuant to 10 CFR 32.14 to distribute the product to persons exempt from the requirement for an NRC license. 10 CFR 30.15(a)(5) describes marine compasses containing not more than 750 millicuries of tritium gas and other marine navigational instruments containing not more than 250 millicuries of tritium gas as products exempt from the requirement for an NRC license.

Contrary to the above, on August 28, 1990, Plastimo, USA, Inc., initially transferred for sale or distribution a marine compass containing 20 millicuries of tritium gas without a specific license issued pursuant to 10 CFR 30.15.

This is a Severity Level IV violation. (Supplement VI)
