Docket No. 50-254
 Docket No. 50-265

Commonwealth Edison Company
 ATTN: Mr. Cordell Reed
 Senior Vice President
 Opus West III
 1400 Opus Place
 Downers Grove, IL 60515

Gentlemen:

This refers to the routine safeguards inspection conducted by Messrs. J. R. Kniceley and G. L. Pirtle of this office on December 10-24, 1990, of activities at Quad Cities Nuclear Generating Station, Units 1 and 2, authorized by Operating Licenses No. DPR-29 and No. DPR-30, and to the discussion of our findings with Mr. R. Bax and other members of your staff at the conclusion of the onsite inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No violations of NRC requirements were identified during the course of this inspection. However, an unresolved item was identified relating to containment access controls during outages when the reactor cavity is flooded. This issue is described in Section 5.a of the Report Details.

Areas examined during this inspection concern a subject matter which is exempt from disclosure according to Part 73, Title 10, Code of Federal Regulations, Section 73.21(c)(2). This information must be handled and protected in accordance with the provisions of 10 CFR 73.21. Consequently, our report of this inspection will not be placed in the NRC Public Document Room.
