ATTN: Karen Gupta, President
11612 Bowling Green Drive
St. Louis, MO 63146

License No. 24-21362-01
Docket No. 030-20567

Gentlemen:

This refers to the routine safety inspection conducted by Messrs. Roy Caniano and Gary Shear of this office on December 17 and 18, 1990, of activities authorized by License No. 24-21362-01 and to the discussion of our findings with you and members of your staff at the conclusion of the inspection. This also refers to the site visit and facility tour by Mr. A. B. Davis and myself on December 18, 1990.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel. The inspection also included a review of the November 29, 1990 audit conducted by the independent auditor. In our review of that audit report we noted in the "Introduction" section that a change in the reporting format for these audits was suggested by you. Please be advised that the audit plan is referenced in your NRC license and any changes to that plan must receive prior approval by the NRC.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

John A. Grobe, Chief
Nuclear Materials Safety Branch
