Docket Nos. 50-446/90-27
50-446/90-27
License Nos. NPF-87
CPPR-127

TU Electric
ATTN: W. J. Cahill, Jr., Executive
Vice President, Nuclear
Skyway Tower
400 North Olive Street, L.B. 81
Dallas, Texas 75201

Gentlemen:

This refers to the inspection performed by members of our staff during the period from October 15 through November 16, 1990, of activities authorized by NRC Operating License NPF-87 for the Comanche Peak Steam Electric Station (CPSES), Unit 1, and to the discussion of our findings with you and other members of your staff at the conclusion of the inspection on November 16, 1990.

This maintenance team inspection was performed to evaluate the effectiveness of maintenance activities at CPSES. Within the scope of this effort, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The inspection findings are documented in the enclosed inspection report. The Executive Summary to the report includes a listing of the strengths and weaknesses identified by the team.

The inspectors concluded that you have developed a generally effective maintenance program that is being implemented in an adequate manner to maintain the plant in good operating condition. The team noted strong management support for CPSES maintenance activities and a commitment toward improving the control, coordination, and implementation of the maintenance process. The team identified weaknesses in your maintenance program related to control of work activities with respect to temporary modifications and non-safety related work functions performed on safety-related components.

Within the scope of this inspection, no violations or deviations were identified.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,
Original Signed By:
Samuel J. Collins

Samuel J. Collins, Director
Division of Reactor Projects
