EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10) [0 2 With the plant in Mode 5 and Reactor Coolant System drained to mid-loop.
[0]3 routine operator inspection revealed a decreasing Component Cooling Water System
[0]4] [(CCWS) surge tank level indicating a leak in the CCWS. Consequently, Train "A"
Shtudown Cooling System (SCS) was declared inoperable. Since the redundant full
capacity SCS train remained operable throughout the event, there was no impact on the
health and safety of plant personnel or the public.
