Pursuant to Section 50.90 of the regulations of the U. S. Nuclear Regulatory Commission ("the Commission"), Omaha Public Power District, holder of Facility Operating License No. DPR-40, herewith requests that Sections 2.10.3 and 6.4 of the Technical Specifications set forth in Appendix A to that License be amended to incorporate limiting conditions for operation with less than 75% of the incore detector strings operable and to delete similar interim special Technical Specifications for Cycle 6 operation, which are no longer applicable.

The proposed changes in Technical Specifications are set forth in Attachment A to this Application.
