In the Matter of
LOUISIANA POWER AND LIGHT COMPANY,
(Waterford Steam Electric Station,
Unit 3)

Docket No. 50-382-0L

November 17, 1982

MEMORANDUM
(Errata in LBP-82-100)

Enclosed are corrected pages to LBP-82-100, our Partial Initial Decision of November 3, 1982. The pages correct one misnomer and three typographical errors brought to our attention by the Staff (NRC Staff ltr. dtd. Nov. 16, 1982). On page 18, line 16, "Plant Superintendent" should have read "Plant Manager." On page 56, line 11, "radioactive" should have read "radioprotective." On page 58, commencing on line 1, the phrase "the iodide in reducing the amount of radioactive iodine taken up in the thyroid gland appears to be dependent on two factors: (1)" is redundant and should have been

DS02

omitted. Finally, on page 65, line 10, "5-3" should have read "5-35." ^{*/} The enclosed pages constitute the correct version and will be published in the official Nuclear Regulatory Commission Issuances.

FOR THE ATOMIC SAFETY AND
LICENSING BOARD

Sheldon J. Wolfe, Chairman
ADMINISTRATIVE JUDGE

Dated at Bethesda, Maryland
this 17th day of November, 1982.

^{*/} We appreciate the Staff's diligence in bringing these errors to our attention. Several of Staff's comments, however, reflected disagreement with the substance of our findings and conclusions, and did not address errata; it would be inappropriate for us to act on these comments, and we decline to do so.
