)
(Nine Mile Point Nuclear Station Unit No. 2)

APPLICATION FOR AMENDMENT

TO

OPERATING LICENSE

Pursuant to Section 50.90 of the Regulations of the Nuclear Regulatory Commission, Niagara Mohawk Power Corporation, holder of Facility Operating License No. NPF-69, hereby requests that Section 1.9 of the Technical Specifications set forth in Appendix A to that License be amended. This proposed change has been revised in accordance with Section 6.5 of the Technical Specifications.

The proposed changes to the Technical Specifications are set forth in Attachment A to this Application. Section 2.2, including Table 4.3.7.10-1, "Radioactive Gaseous Effluent Monitoring Instrumentation Surveillance Requirements," is being proposed for revision to require isolation of the offgas system as part of the refueling cycle channel calibration of the Noble Gas Activity Monitor. This is in lieu of the requirement to demonstrate actual isolation during the monthly functional test. The proposed change also revises Table 3.3.7.10-1, "Radioactive Gaseous Effluent Monitoring Instrumentation," to reflect the actual number of instrument channels in the Noble Gas Activity Monitor system. The proposed change would not authorize any change in the types of effluents or in the authorized power level of the facility. Supporting information and analyses which demonstrate that the proposed changes involve no significant hazards consideration pursuant to 10 CFR 50.92 are included as Attachment B.
