P. O. Box 1535
Lusby, Maryland 20657

Dear Mr. Creel:

SUBJECT: WITHDRAWAL OF AMENDMENT REQUEST TO MODIFY THE PRESSURE/TEMPERATURE LIMITS AND LOW TEMPERATURE OVERPRESSURE PROTECTION FOR CALVERT CLIFFS NUCLEAR POWER PLANT, UNITS 1 AND 2, TAC NUMBERS 71475 (UNIT 1) AND 71476 (UNIT 2)

By letter dated October 27, 1989, you requested amendments to the Units 1 and 2 Technical Specifications (TS). The requested changes included: revised fluence projections; revised analysis based on Regulatory Guide (RG) 1.99, Revision 2; revised Pressure/Temperature (P/T) curves in accordance with 10 CFR Part 50, Appendix G; and revised low temperature overpressure protection (LTOP) analysis and controls. These requested changes were in response to the NRC Generic Letter (GL) 88-11 which provided new staff positions regarding the calculation of radiation embrittlement of reactor vessel beltline material as detailed in RG 1.99, Revision 2.

Your letter dated January 28, 1991, withdrew the requested amendments. You indicated that the initial request was superseded by individual requests for each unit. The analysis used to support these requests were consistent with the guidance provided in GL 88-11 and RG 1.99, Revision 2. The NRC staff reviewed and approved your requests and issued Amendment No. 146 on September 18, 1990, for Unit 1 and Amendment No. 131 on December 18, 1990 for Unit 2.

Based on your request and the details discussed above, we have determined that you have completed the actions required by GL 88-11 and have closed the above referenced TAC numbers.

Sincerely,
ORIGINAL SIGNED BY:
Daniel G. McDonald, Senior Project Manager
Project Directorate I-1
