Gentlemen:

SUBJECT: REQUEST FOR AN AMENDMENT TO LICENSE NO. 48-24563-01 DATED
July 31, 1990, AND OUR REQUEST FOR ADDITIONAL
INFORMATION BY PHONE ON September 19, 1990.

Gentlemen:

We requested in the above mentioned phone conversation between Mr.
Bruce Stowe and John D. Jones of our office that you respond to us
with additional information.

We requested documentation that the gauge device manufactured by
Industrial Analytics Corporation has been evaluated and approved by
the U.S. Nuclear Regulatory Commission Sealed Source and Device
Registry. In that conversation Mr. Stowe indicated that since
Industrial Analytics has not yet received approval for the device,
it is your desire that the action be voided.

You are hereby notified that the action has therefore been voided.
This is without prejudice to ~~re~~submission of the application.

If you will submit this ADDITIONAL INFORMATION in a letter to this
office within 12 months of the date of this letter, we will
continue review of this item. In your submittal make sure that you
say in your letter that you are submitting the material as
ADDITIONAL INFORMATION. Please reference Control Number 389993
if you would like to reactivate this action.

If you have any questions or require clarification of any of the
above stated information, contact us at (708)790-5625.

Sincerely,

Original Signed By

Attn: Materials Licensing Section
799 Roosevelt Road
Glen Ellyn, IL 60137

Dear Sirs:

We would like to apply for an amendment to our license
#48-24563-01.

Item Nos. 6, 7, 8, and 9 I would like to be modified to
include the following information.

6. B. Strontium 90
C. Krypton 85
7. B. Sealed Source SIF.1174 (NRC Model SIF.D1)
ANSI 77C64343.
C. Sealed Source X.1088 (NRC Model KAC.D3)
ANSI 77C43232.
8. B. No single source to exceed 10mCi
C. No single source to exceed 25mCi
9. B. To be used in an Industrial Analytics Corporation
Model BSP-01S backscatter gauge for mass
measurements.
C. To be used in an Industrial Analytics Corporation
Model BSP-01K backscatter gauge for mass
measurements.

The rationale for adding the above sources and gauges to
our license is to improve the overall safety of our use of
these portable gauges. This new gauge is manufactured by a
different supplier and offers some significant safety
procedures in our use of the equipment. All of the gauges
perform the same function, but the new gauge (BSP-01S and
BSP-01K) are "non-contacting" instruments.

Our preliminary review with the supplier shows equivalent accuracy of results while using this technique, and we feel confident a non-contacting gauge will be a safer procedure for our operators.

Sincerely yours,

ALBANY INTERNATIONAL
