Vice President
Nuclear Operations
Florida Power Corporation
AITN: Manager, Nuclear Licensing
P. O. Box 14042; M.A.C. H-2
St. Petersburg, Florida 33733

Dear Mr. Hancock:

By letter dated September 27, 1982 we sent you a Safety Evaluation (SE) concerning the electrical, instrumentation and control aspects of the Crystal River Nuclear Generating Plant, Unit 3 Auxiliary Feedwater System, TMI Action Plan Item II.E.1.2. Our SE was based on design information including design descriptions and logic diagrams which we thought to be sufficient at that time. However, in view of a recent finding that our understanding of the design may not accurately represent the final system to be installed, we request that you submit detailed electrical schematic diagrams showing the actual automatic initiation circuitry and emergency feedwater system pump and valve control circuits to be installed.

With this information we will reexamine your design to determine it our conclusions as stated in the SE still remain valid. Please contact your project manager if you have any questions.

The reporting and/or recording keeping requirements contained in this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P. L. 96-511.

Sincerely,

JOHN F. STOLZ*

Dear Mr. Hancock:

By letter dated September 27, 1982 we sent you a Safety Evaluation (SE) concerning the electrical, instrumentation and control aspects of the Crystal River Nuclear Generating Plant, Upit 3 Auxiliary Feedwater System, TMI Action Plan Item II.E.1.2. Our SE was based on design information including design descriptions and logic diagrams which we thought to be sufficient at that time. However, in view of a recent finding that our understanding of the design may not accurately represent the final system to be installed, we request that you submit detailed electrical schematic diagrams showing the actual automatic initiation circuitry and emergency feedwater system rump and valve control circuits to be installed.

With this information we will reexamine your design to determine if our conclusions as stated in the SE still remain valid. Please contact your project manager if you have any questions.

The reporting and/or recording keeping requirements contained in this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P. L. 96-511.

Sincerely,

John F. Stolz, Chief
