Docket 50-293

Start of Third Ten Year Interval Inservice Inspection Program

Boston Edison Company (BEC0) is submitting this letter to affirm the start date of the Inservice Inspection (ISI) Program Third Ten Year Interval for Pilgrim Nuclear Power Station.

In a letter to the NRC dated May 31, 1989, we advised you we were extending the end of the ISI Program Second Ten Year Interval to June 30, 1995 as a consequence of our extended plant outage. Paragraph IWA 2400(c) of the 1980 ASME Section XI Winter Addenda Code allows extensions of the current interval when extended outages are encountered.

The 1980 ASME Section XI Winter Code does not specifically state when the succeeding interval begins following such an extension. Our ISI Program Third Ten Year Interval will begin July 1, 1995 at the end of our present interval.
