Rec'd 1-8-91

Dear Mr. Grimsley:

Under the Freedom of Information Act, I wrote to the FDA who referred me to the NIH who referred me to you. I would like to request the following:

According to the U.S. Pharmacopeia, a Society of Nuclear Medicine problem report was filed sometime in late 1981 or early 1982 regarding a possible adverse experience in which a Du Pont (New England Nuclear) Tc99m Generator, lot number 8201-5F-221 was cited as the source of the radionuclide. The USP accession number of the report is 700505, and the reporter was from the NIH in Bethesda, MD.

I would appreciate it if you could send me a copy of this report and any attachments relating to this case to:

Laura Dowling
Du Pont Regulatory Affairs

Thank you for your help in this matter.

Sincerely,

Laura Dowling
