MEMORANDUM FOR: Boyce Grier, Director, Region I
FROM: John T. Collins, Deputy Director, TMI Support
SUBJECT: LETTER OF COMMENDATION FOR WILLIAM RAYMOND

Since March 28, 1979, William (Bill) Raymond has been at the Three Mile Island Station. During this period Bill has been a principle reviewer for I&E on all emergency procedures instituted as a result of the accident and operating procedures for the system modifications required for the recovery operations. In addition, Bill has followed very closely the two penetrations made to the containment building for the purpose of collecting data for future containment entry and decontamination. Without his technical help and insight it would have been very difficult for the staff to complete our work on a timely basis. On numerous occasions over the past seven months Bill has unselfishly given of his own time to see that ongoing projects has NRC coverage. Through all this, Bill has always conducted himself in a very professional manner and is a credit to himself, Region I and the NRC. I personally want to commend Bill for his outstanding contribution to the NRC effort at TMI. I know I join with the other members of the on-site staff in saying that Bill's technical assistance and insight will truly be missed in coping with the complex and difficult task facing us down the road as part of the recovery operation.

It has been a real pleasure for me to have had the opportunity to work with Bill over these past months and I look forward to working with Bill again some time in the future.

John T. Collins
