Dear Dr. Schwartz:

I have enclosed a copy of a letter to Leland C. Rouse, Chief, Advanced Fuel and Spent Fuel Licensing Branch, dated October 7, 1982. The letter notifies the Nuclear Regulatory Commission that Gesellschaft fuer Nuklear Service, mbH (GNS) is withdrawing all proprietary information in its Topical Report entitled, "Topical Safety Analysis Report for a Castor Cask Type Independent Spent Fuel Storage Installation (Dry Storage)." In separate conversations, GNS has told us that it would prefer that most of this information be destroyed rather than returned. Accordingly, I am requesting that you confirm to me that all copies of the proprietary information (all Appendices to the report except Appendices 2, 4, and 5) in the report have been destroyed.

Thank you for your cooperation on this matter.

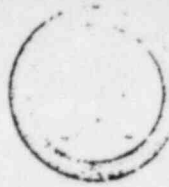

Sincerely,

John P. Roberts, Project Manager
Advanced Fuel and Spent Fuel
Licensing Branch
Division of Fuel Cycle and
Material Safety

Subject: Topical Safety Analysis Report for a CASTOR case
Type Independent Spent Fuel Storage Installation
(Dry Storage)

Gentlemen,

pursuant to your letters of August 13, 1982 and September 9, 1982 together with our subsequent discussions related to 10 CFR 2.79 as pertains to public disclosure, GNS herewith confirms its decision to withdraw the proprietary portions of the subject Topical Report which was submitted to NRC on May 1982 and later docketed (in June 1982) under Project No. M-34.

It should be noted that in replacement of the aforementioned document GNS plans to submit during November 1982 a Topical Report revised in accordance with your letter of September 9, 1982 and so constructed as to permit, for the most part, its release for public disclosure.
