MEMORANDUM FOR: All Operating Reactors Project Managers

THRU: A. Schwencer, Chief, Operating Reactors Branch #1  
D. Ziemann, Chief, Operating Reactors Branch #2  
T. Ippolito, Chief, Operating Reactors Branch #3  
R. Reid, Chief, Operating Reactors Branch #4

FROM: P. C. Wagner, Lead Engineer, ALARA

SUBJECT: 40 CFR 190 Implementation

By letter dated September 13, 1979, all power reactor licensees were informed that the requirements of 40 CFR 190 - EPA Uranium Fuel Cycle Standard - become effective on December 1, 1979. Since NRC is charged with implementing this Regulation, the licensees were requested to submit their plans for demonstrating compliance by November 1, 1979.

We have received a number of responses to that request. Some of these do not appear adequate and will require follow-up action. You will receive a memo from ETSB, which is responsible for this action, if your facility's response was not adequate, requesting that specified additional information be obtained.

There are, however, a number of licensees which have not responded to our request. These facilities are indicated on the attached list. It is requested that the ORPM for these facilities contact them within the next week and advise them that we must have their commitment to conform to 40 CFR 190 prior to December 1. Please inform me of the results of those conversations so a master list of the status of this subject can be maintained.
