Director of Nuclear Material Safety and Safeguards
U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, D. C. 20555

Gentlemen:

River Bend Station - Unit 1
Refer to : Region IV
Docket No. 50-458

Pursuant to 10CFR50.54(p), Gulf States Utilities Company (GSU) submitted on May 29, 1990 (RBG-32904) Revision 12 to the River Bend Station Physical Security Plan, (PSP). At that time several questions were raised by the Region IV reviewer. GSU resubmitted the plan changes as Revision 12A (RBG-33773 dated October 12, 1990) to include GSU's response to those questions. All questions were resolved in Rev. 12A except one which had been directed to NRR headquarters. Since NRR subsequently ruled that the one plan change was an unacceptable decrease in program effectiveness, Revision 12B is herein submitted (in total) to reinstate the original plan requirements for the one item. Revision 12B supersedes all earlier revisions and includes an explanation of the changes to facilitate NRC review.

The PSP is considered "Safeguards Information" pursuant to 10CFR73.21 and should be handled accordingly. Should you have any questions, please contact Mr. David N. Lorfing at (504) 381-4157.

Sincerely,

W. H. Odell
Manager-Oversight
River Bend Nuclear Group
