Gentlemen:

Subject: Combined Inspection Nos. 50-317/90-30 and 50-318/90-30

This letter refers to the initial inspection of the Fitness-For-Duty (FFD) Program developed for and being implemented at the Calvert Cliffs Nuclear Power Plant, Units 1 and 2, Lusby, Maryland. The inspection was conducted on October 30 - November 1, 1990, by Messrs. A. Della Ratta and R. J. Albert of this office.

Areas examined during the inspection are described in the NRC Region I combined inspection report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

Based on this inspection, we determined that the development, and implementation of your FFD program are responsive to both the spirit and intent of the FFD rule and that the program is aggressive and comprehensive. We also found that the professionalism and technical expertise exhibited by personnel involved in administering the program are commendable.

However, within the scope of this inspection, it appears that one of your activities was not conducted in full compliance with the requirements of 10 CFR Part 26 as set forth in the Notice of Violation enclosed herewith as Appendix A. The violation has been categorized by severity level in accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (Enforcement Policy). You are required to respond to this letter, and in preparing your response, you should follow the instructions in Appendix A.

In addition, three unresolved items were identified during the inspection. In your response to this letter, we would appreciate receiving a summary of the current status of the items identified as unresolved in the enclosed inspection report.
