Subject: FIRE OF SUSPICIOUS ORIGIN IN SITE ADMINISTRATIVE BUILDING

At approximately 4:16 a.m. on November 19, 1982, a small fire was discovered in the Outage Planning Room on the second floor of the South Service Building, which houses site administrative functions. The building is in the plant protected area but is not adjacent to safety related structures nor does it house safety-related equipment. A contractor employee walking past the room reportedly discovered the fire and extinguished it with water. A liquid appeared to have been poured on a table adjacent to a wall and set on fire. A burnt match and a melted plastic cellophane tape dispenser were found in the scorched area on the table. Very little damage occurred.

The State Fire Marshal and licensee investigators are onsite investigating the incident. Region I will monitor the licensee's investigation.

Region I received notification of the incident from the Site Security Supervisor at 8:42 a.m. on November 19 and subsequently notified the FBI and the IAT. No press release is presently planned by the licensee or the NRC. The State of Maryland has been notified.

Calvert Cliffs 1 is operating at full power and Calvert Cliffs 2 is in a refueling outage.

This Preliminary Notification is issued for information only.
